Case management.

Case management in Workday Help provides a personal touch when your employees need additional assistance or information. Employees, as well as case solvers, benefit from an intelligent HR case management system that enables the case solver to view the case history, reducing the need to retrace steps and providing quicker resolution.

Enhanced employee experience.

When employees open a case, they get an experience that immediately supports them with the ability to create a case at the point of need whether on their desktop or mobile device, or even directly from a knowledge article. From there they can track the progress of their case and communicate with case solvers, keeping them in the loop throughout the process.

Build HR productivity.

Case solvers can work more productively and efficiently, with the ability to review an employee's data, the case history, notes that other HR team members may have added, and attachments, plus the ability to reply directly to the employee—all in one place. Service teams can benefit from feedback about the requester's experience through an automatically triggered configurable questionnaire, helping to improve future case outcomes.

In some industries, employees are supported through a call center or a help email alias. With Workday Help, you have the option to open cases on behalf of an employee, enabling you to provide a more hands-on approach.
